

Resources – Energy Efficiency & Building Science

www.eere.energy.gov – great source for information on a wide variety of topics related to energy efficiency and construction

www.buildingscience.com - Building Science Corp. – great resource for buildings science topics and energy efficiency

http://www.eere.energy.gov/buildings/building_america/pdfs/db/35017.pdf
article by Nathan Yost & Joseph Lstiburek that details safe, effective methods of insulating basements

<http://hes.lbl.gov/> - the Home Energy Saver – developed by the Lawrence Berkeley National Laboratory – allows assessment of energy consumption for a house and potential savings from energy retrofits. Results are specific for location and permit user to enter house parameters such as age, size, number of stories and more.
